

The EDU-VET – project

The main objective of the EDU-VET project is to create new teaching and learning environments for VET. The project focuses on the development of e-learning courses. For this reason, the project partners will design a curriculum and an online teaching approach for learning technical education at vocational schools.

The project is funded by the European Union. The 26-month project (funding period 01.09.2019 to 31.10.2021) is coordinated by University of Paderborn in Germany, presented by Prof. Dr. Marc Beutner.

The other five European project partners are Ingenious Knowledge GmbH and Berufskolleg Bocholt-West from Germany, Lancaster and Morecambe College from the United Kingdom, Centro Integrado de Formación Profesional Somes from Spain and Stichting BE Oost-Gelderland from the Netherlands.

Main objectives:

- Creating new teaching and learning environments for VET
- Creating online courses in a learning platform
- Supporting the use of digital technologies within learning in the metal
- Creating an EDU-Curriculum and online-courses on a learning platform
- Creating an online-showroom for insights into real companies in the metal work sector
- Providing a handbook and guideline for teachers
