E-Learning, Digitisation and Units for Learning at VET schools –
Creating online Learning Environments in Technical Education for
European metal industry

Short evaluation - Feedback

EDU-VET-Meeting 5:

Final EDU-VET Policy Meeting

22nd to 24th of March 2022

Project Title: E-Learning, Digitisation and Units for Learning at
VET schools – Creating online Learning
Environments in Technical Education for European metal industry

Acronym: EDU-VET

Reference number: 2019-1-DE02-KA202-006068

The meeting evaluation of the 5th EDU-VET project meeting shall give an overview of the feedback about the online partner meeting, hosted by Berufskolleg Bocholt-West, Germany.

This questionnaire will be handed out as a survey during the meeting and will be answered by one person per institution to evaluate the meetings content, the meetings design, the coordination and the results of the meeting.

Moreover, all participants want to do more dissemination activities, e.g. posts on social media channels and website, online articles, internal communication platform (portal), posters and flyers. Additionally, the project participants thank for the good cooperation so far and are looking forward to further project work.

Nevertheless, the answers show that the Corona pandemic poses challenges in project work. All project meetings, contacts with companies, trainers, etc. are handled online, which makes communication very difficult. Anyway, we are on track with all project activities.

Even so, each partner has a clear picture of the meeting objectives and considered the meeting as helpful.

Please find below the summarised evaluation data:
